

PREM INDUSTRIES
INNOVATION IN ACTION

COMPANY PROFILE

PREM INDUSTRIES INDIA LTD.

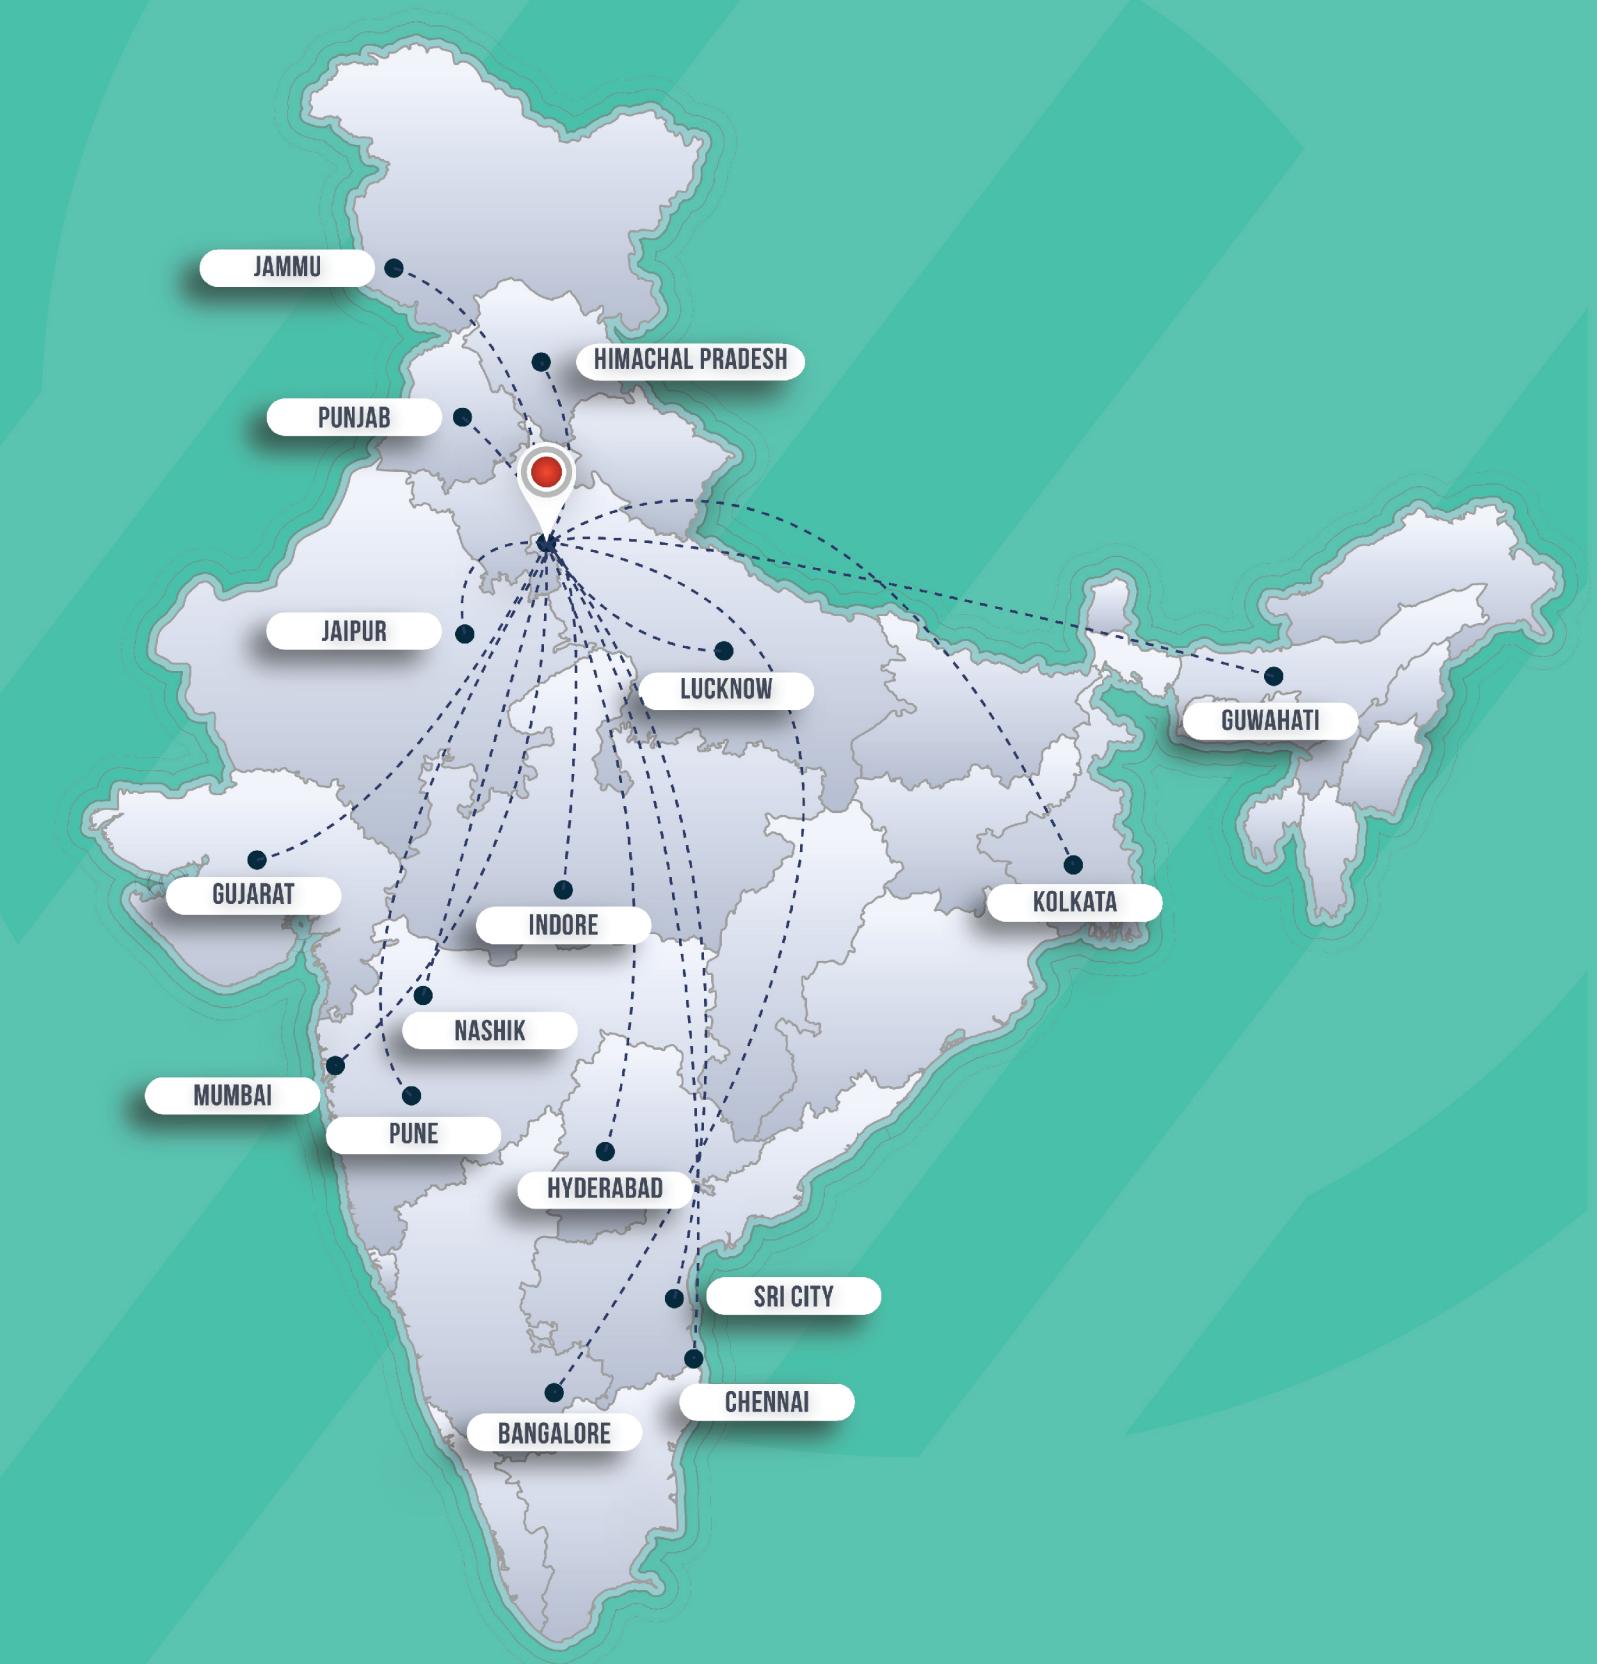

■ ABOUT US

- Founded in 1977 by Mr. Ved Prakash Goel, Goel Group is now a diversified B2B organization in India.
- We have a strong presence in northern India, with growth driven by packaging, steel, retail, and construction.
- Headquartered in Uttar Pradesh, we are market leaders in packaging and steel trading in North India, focusing on large-scale development and global-standard O&M practices.
- Our success stems from our core philosophy of 'nation building' and 'growth with goodness,' ensuring sustainable growth.
- Out of our 25 lakh square feet covered area, 20 lakh square feet are in prime locations across Delhi NCR, catering to various demands.

■ PRESENCE IN INDIA

■ TIMELINE (48 YEARS EXPERIENCE IN MANUFACTURING)

1977

Installation of first foot operated corrugation machine and we landed our first client Dabur India in 1978 - A long relationship we still carry

2005

Installation of offset printing machine

2019

Started producing tailor-made flexible packaging solutions

2017

Introduction of rigid box manufacturing

April 2022

We became a Limited Company. Limited by name unlimited by abilities.

C

2006

Automated corrugation line began

D

2006-2012

Phase of expansion, exploring technologies & advancements for the company.

E

2013

New manufacturing facility launched in Greater Noida, UP. Spread over 2 lac sq. ft with state of the art corrugated box setup with machines from industry leading innovators.

J

I

June 2022

Paper coating division started that involves the production of label stocks & specialty tapes to start with.

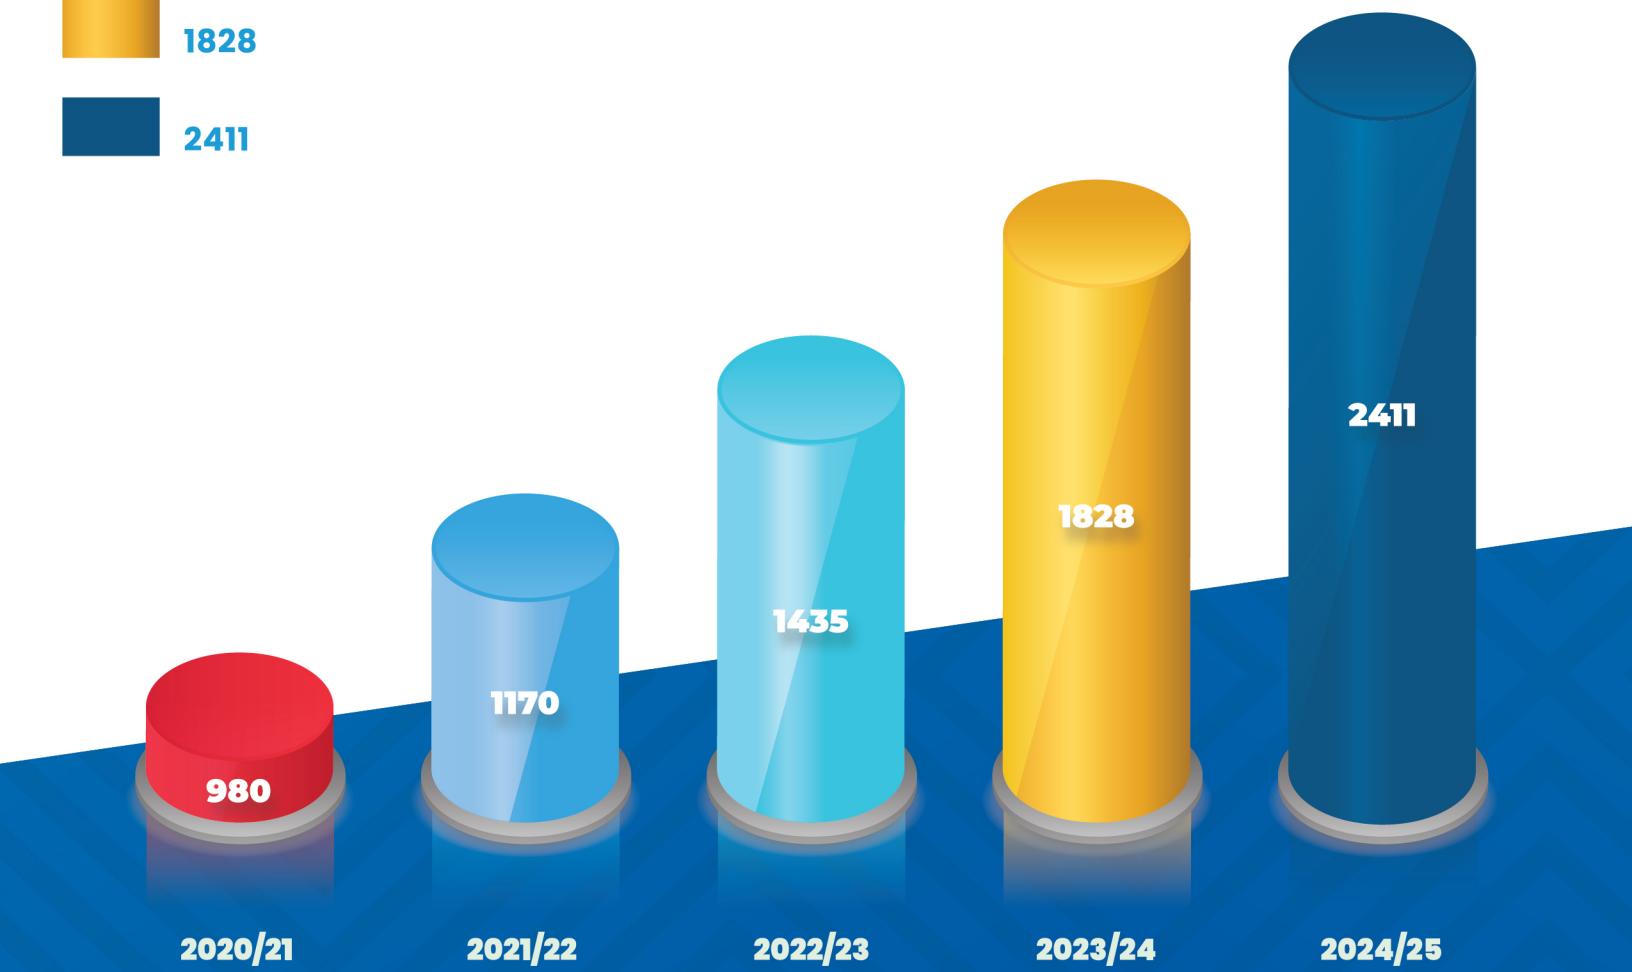

August 2022

Introduced our steel division in Dadri, specializing in various sheet metal components.

■ OUR MISSION

- 01
- 02
- 03
- 04
- 05

- Become one of India's top providers of packaging solutions and sheet metal components.
- Prioritize Customer Needs and ensure total Satisfaction
- Continuously upgrade our technology and processes to stay at the forefront of packaging and sheet metal innovations.
- Outperform our Competition as a technologically driven company
- Maintain Simplified operations and inspire our team for greater success

■ OUR VISION

- Become a trendsetter in the Indian packaging and steel industry
- Offer both class-leading services and innovative products

■ OUR VALUE

- Putting our customers at the center of what we do
- Demonstrating leadership in Sustainability
- Building our future on a family business foundation

INFRASTRUCTURE

1. We have 4 Manufacturing Facilities:

- Paper Bag & products Division
- Corrugated & Rigid Box Division
- Flexible Laminate Division
- Offset Printing & Mono Cartons Division

2. Total covered area: 5 lakh Sq feet (Approximately)

3. Total Investment: In Excess of 500 crore

4. Future Investment Plans: Additional 400 crore till 2030

5. Carbon Neutral Target by 2030

■ OUR CORE STRENGTH

INNOVATION

It's in our DNA

We solve the biggest challenges of our customers with an innovative approach and leading technology. We have a team under R & D who deals with premium quality materials, designs & technical aspects. Our team manages machinery and automation with a digital approach to ensure the best output.

■ INFRASTRUCTURE

Currently, there are about 1000+ employees in Prem Industries. We have Four specialised manufacturing units covering 1,00,000 square Meter. These units incorporate the finest technologies from around the world. Our 6 warehousing locations for raw materials and finished goods cover 1 Lakh square feet Area in North India.

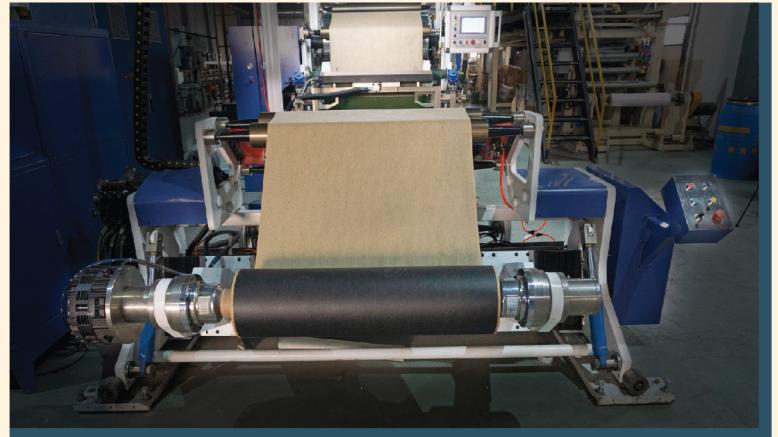

WAREHOUSE

We have created an efficient ecosystem to stay compliant and deliver packaging solutions consistently to achieve customer satisfaction. We have cutting-edge equipment that complies with international standards and an internal setup for everything needed to make a range of packaging. We have labs and quality testing machines /equipment with experts operating them.

MACHINE MIX

HOTMELT COATING MACHINE

- Imported 1300 mm slot die coater with laminating facility
- Turret rewinder
- Wide coating range 14-100 gsm
- Precise coating accuracy +/- 1 gsm
- PLC programmable controller,
- drives, HMI and PID modules for easy operation
- Up to 250 MPM line speed

SILICONE COATING MACHINE

- 5 roll system coating head for uniform coating
- Gravure Trolley
- Corona Coater Trolley
- B hood dryer system
- Up to 250 MPM line speed
- Capable of handling PE/BOPP/PET and paper

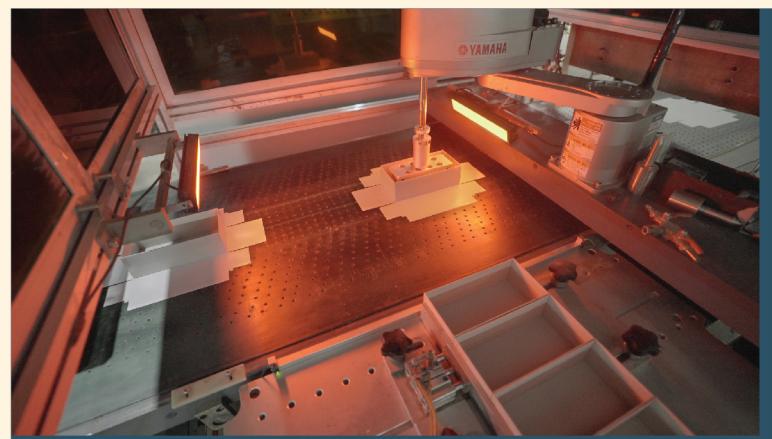

CERRUTI (9 COLOURFULLY COMPUTERIZED ROTOGRAVURE MACHINE)

- Electromat auto register control and E+L web video camera
- 1300 mm ELS 450 MPM line speed
- Auto viscosity control system
- Reverse turn bar for 8+1 or 7+2 reverse printing
- Non-stop auto turret unwinder and rewinder

YAMAHA ROBOTIC POSITIONING SYSTEM (RIGID BOX-MAKING MACHINE MADE IN JAPAN)

- Fully Auto Rigid Box Making Machine With Robotic Arm & Visual Positioning
- High Positioning Accuracy (+- 0.1mm)
- Can Make Ear - To - Ear And
- Ear - Cross- Ear Folding Box
- Also Make Some Irregular Shape Box. Like High - Low Boxes

MING WEI (FULLY COMPUTERIZED 5 PLY AUTOMATIC CORRUGATED BOARD LINE)

- Fully Computerised Machine Connected Via Erp System
1.8 Meter Width
- Top Speed Of 225 Mts/min
- Automatic Glue Kitchen From U.S.A.
Tungsten Carbide Fluting Rolls
(Fluting Options Of A, B, C, E....)
- Available)
- Automatic Rotary Slitter Scorer
- Automatic Board Stacker
- Air Bond System On Double Backer From Uk
- Fully Computerized Production Control System

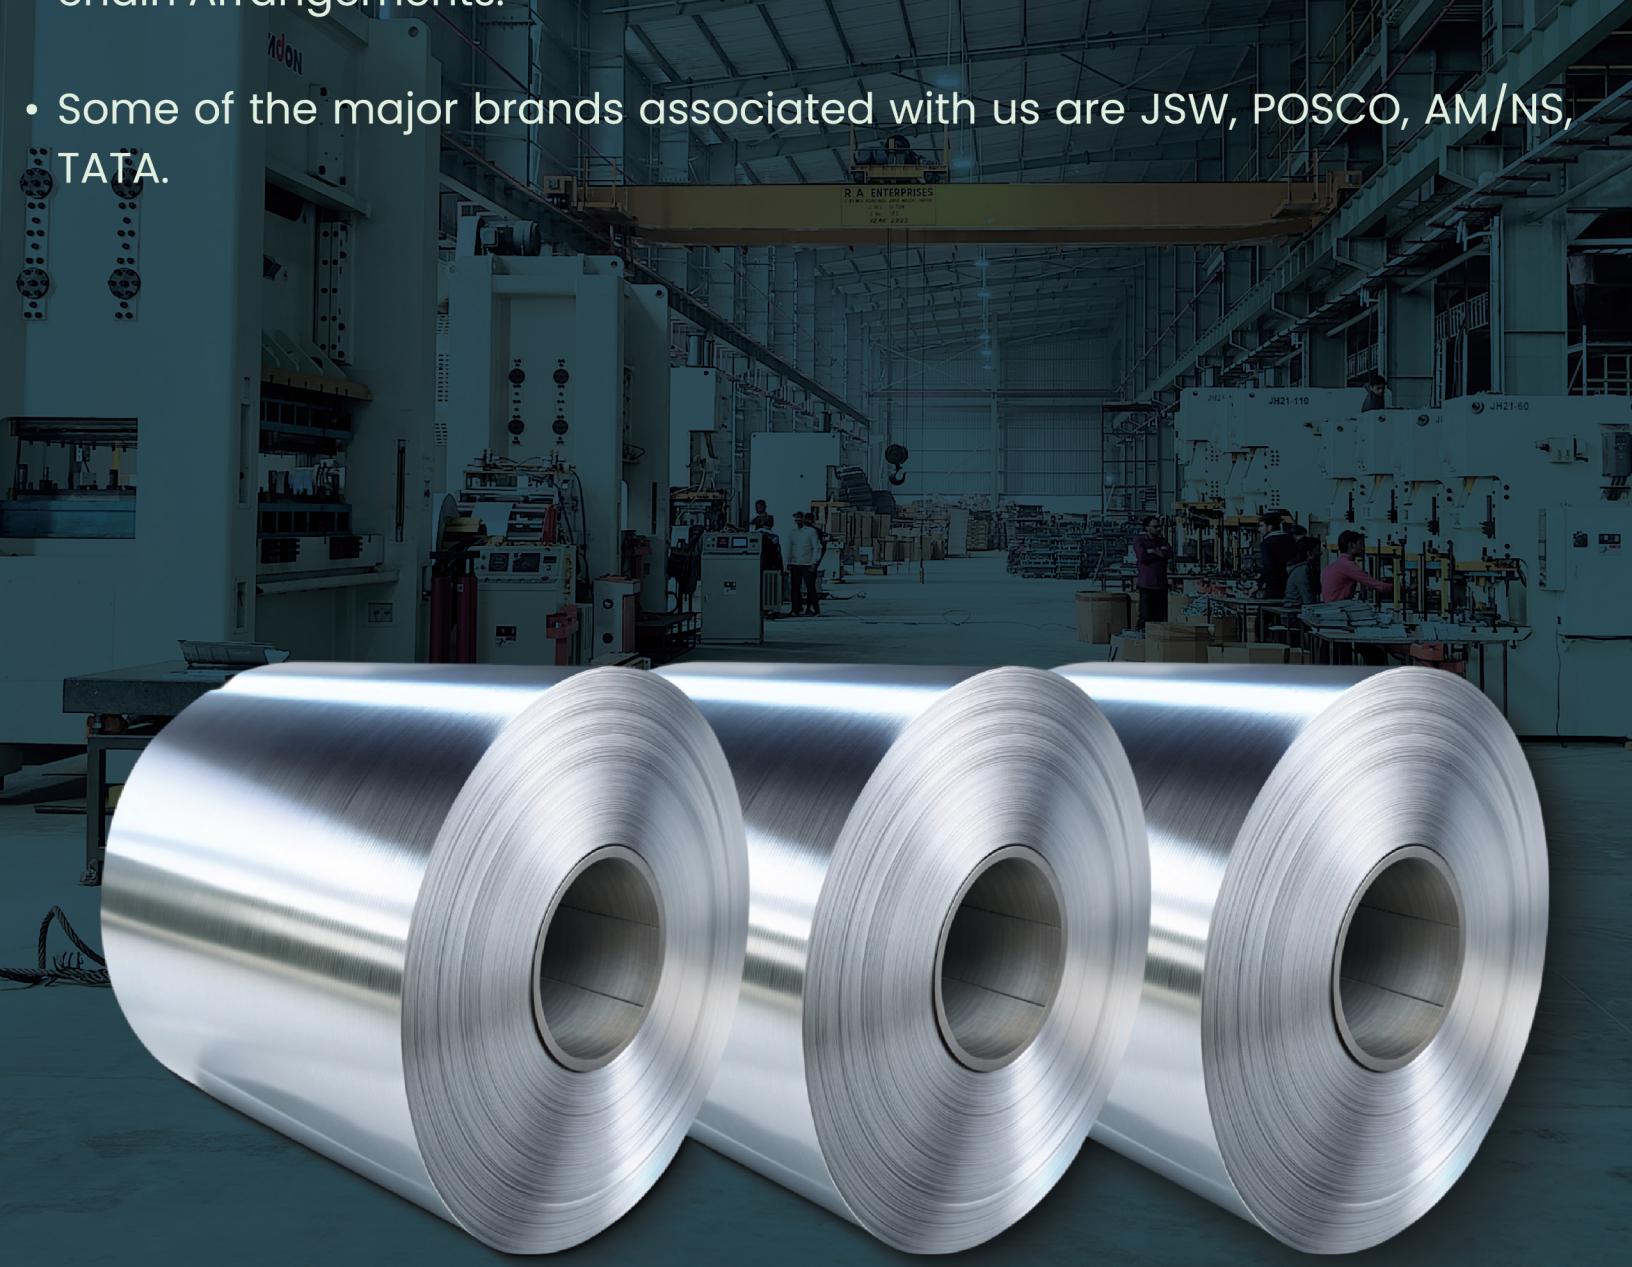

HEIDELBERG (OFFSET PRINTING MACHINES, 7 COLOUR UV PRINTING 6 COLOUR, 5, 4, 2)

- Highly Automated And Most Intelligent Speedmaster
- Machine Speed (Iph): 15,000
Sheets/hr
- Max Printing Size: 28' X 40'
- Capable For Uv Printing
- Alcolor Dampening
- Automatic Roller Wash

SHEET METAL COMPONENT DIVISION

- Greenfield project – Since the Current setup had no space for further expansion, so we have moved the sheet metal component manufacturing setup to our unit-4 in Dadri, Gautam Buddh Nagar.
- We have extensive knowledge of raw material and excellent supply chain Arrangements.
- Some of the major brands associated with us are JSW, POSCO, AM/NS, TATA.

PRESS SHOP

Total plan of 50 machines:

- Currently running - 25
- Commencement in Qtr-3 in 2023 - 10
- Commencement in Qtr-4 in 2023 - 15

Full range of machines from 40 tons to 650 tons covering all materials required for white goods industries.

■ We have installed the following machines with capacities as mentioned below:

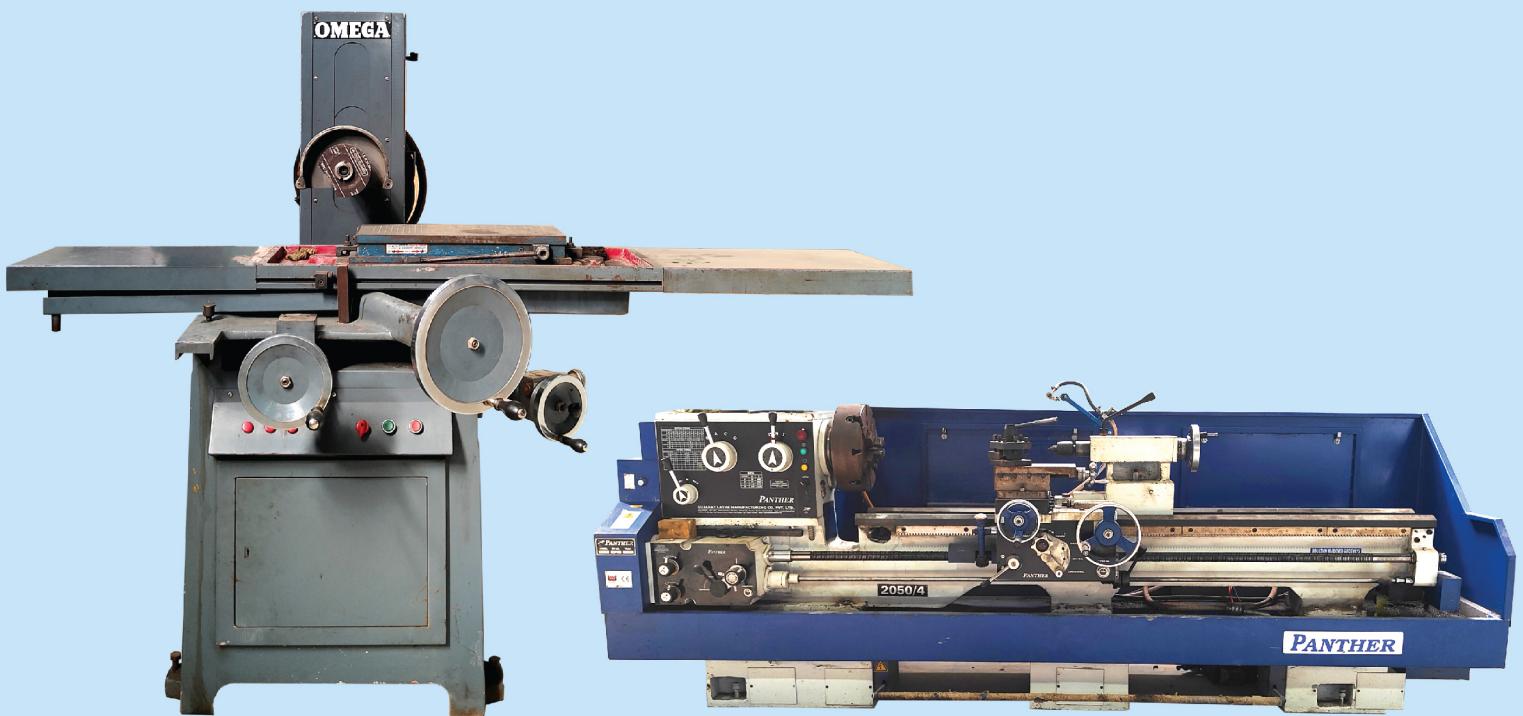

- JH21 SERIES (C Frame) - 45, 60, 63, 110, 160, 250 TON
- JB36 SERIES (H Frame), (DOUBLE CRANK) - 315, 650 TON

■ TOOL ROOM

Fully Equipped in-house tool room for preventive and immediate maintenance of moulds/tools. It includes:

- Milling
- Drilling
- Welding (MIG, TIG, SPOT)
- Surface grinder
- Lathe machine

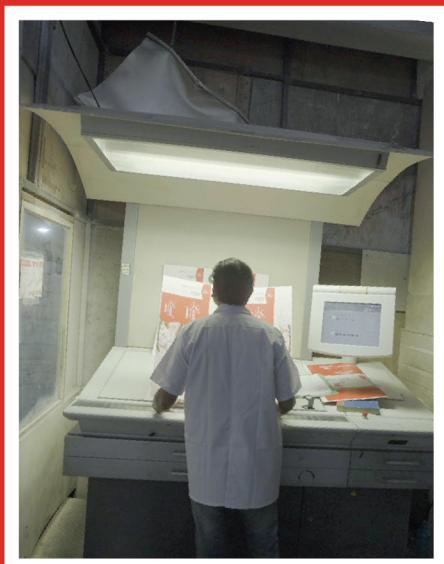

■ QUALITY CONTROL

We have created an efficient ecosystem to stay compliant and deliver packaging solutions consistently to achieve customer satisfaction. We have cutting-edge equipment that complies with international standards and an internal setup for everything needed to make a range of packaging. We have labs and quality testing machines or equipment with experts operating them.

■ RESEARCH & DEVELOPMENT

We are proud to say that our Research and Development (R&D) team is well-equipped to create new packaging or discover new ways to improve the existing packaging line. Our in-house R&D team represents the fusion of various departments. When the experts from different verticals (corrugated, flexible, e-com, printing, rigid boxes etc.) come up with new ideas and innovative approaches, they create a synergy that helps adding value to the packaging solutions and evolve the range.

SUSTAINABILITY

As we work towards creating the best customer experience, we also ensure that sustainable alternatives are offered. We are a tailored company with mindful efforts toward decreasing our carbon footprint. At Prem Industries, we constantly innovate towards sustainability, building a host of eco friendly products made from recycled materials. We advocate responsible functioning, which ensures that the footsteps of sustainable development are followed thoughtfully.

PRACTICES TOWARDS SUSTAINABLE FUTURE

- We utilize Recycled PET (RPET) to significantly reduce the consumption of virgin plastic in our products.
- Our LDPE bags contain 30% recycled content, supporting circular economy practices.
- We offer Biodegradable poly packaging options to minimize long-term environmental impact.
- We manufacture Machine Direction Oriented Polyethylene (MDO-PE) for improved recyclability and reduced material usage.
- We Are also Replacing BOPP Tapes by producing Paper Tape.
